

Characteristics of Transducers :-

It has high stability & ~~low~~ reliability. The output of the ~~transducer~~ transducer should be highly stable and reliable, so that there will be minimum errors in measurement. The output should remain unaffected by environmental conditions such as change ~~in~~ in pressure, temperature, etc.

Subject : PHYSICS

Topic : Transducer Characteristic,
Recording & Reproduction of Sound.

Class : T&C-I, Paper-II

E-Content No. : 14

Date : ~~15-0~~ 04-04-2020

Time : 2-3 AM
